

VIDYANSHU KUMAR SINHA

+91-7765900497 – vidyanshu.sinha@gmail.com – [LinkedIn](#)

Summary: Enthusiastic Computer Science graduate with solid backend development skills in Python, Flask, and FastAPI. Experienced in building APIs, working with MySQL, GenAI tools like LangChain and open-source LLMs via Ollama.

Education

B.TECH, CSE (Specialization in AI&ML) CV RAMAN GLOBAL UNIVERSITY.	2021 - 2025
Higher Secondary D.A.V PUBLIC SCHOOL	2019 - 2020
Senior Secondary D.A.V PUBLIC SCHOOL	2017 - 2018

Projects

1. Task Manager API

Built a RESTful API using **Flask** for a task management system with **JWT** authentication and **RBAC**. Enabled secure task operations (create, update, delete) with filtering and priority handling, backed by **MySQL**. Included API documentation with Swagger and used **Docker** for containerized deployment.

2. Music Genre Classification Using Deep Learning ([repository](#))

Developed a scalable backend for **Music Genre Classification** using deep learning with **TensorFlow** and **Keras**, and exposed the model through a high-performance **FastAPI** service. Deployed the application on **Azure App Service** and automated CI/CD workflows using **GitHub Actions**

3. GenAI-Powered Chatbot for Document Search & Text-to-SQL

Built a chatbot using Azure OpenAI, **LangChain**, and **RAG** for document retrieval and text-to-SQL conversion. Used Azure Cognitive Search and **OpenAI** embeddings for semantic understanding.

Internship

Company - Insergo Technologies

Project - Ansible-Powered Configuration Automation API

Responsibility - Developed and deployed a containerized **Flask API** server for automating last mile configuration via **ansible**: [Certificate](#)

Certifications

Cisco

1. Cisco Certified Network Associate: Learned and understood about layer 3 networking, routing and switches: [Certificate](#)

Coursera

1. Using Python to Interact with the Operating System: [Certificate](#)

Goldman Sachs

1. Software Engineering Job Simulation: Gained hands-on exposure on how engineers at Goldman Sachs approach security and system design: [Certificate](#)

Skills

Languages - Python, C, C++, SQL

Developer Tools – Git, Git Hub

Framework – Flask, Fast API, REST API

Machine Learning – Deep Learning, NLP, Machine learning Algorithms.

Cloud – AWS (Amazon Web Service), Microsoft Azure

LLM & GenAI Tools – LangChain, OpenAI API (GPT-3.5, GPT-4), HuggingFace, RAG Architecture, Prompt Engineering, FAISS
